MARCH 1963 SUMMARY

Federal Milk Order

Market Statistics

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

AUG 5 - 1963

C & R-PREP.

MARCH HIGHLIGHTS

CLASS I SALES UP 0.3 PERCENT; DELIVERIES UP 1.5 PERCENT

61 PERCENT OF DELIVERIES USED IN CLASS I

MINIMUM CLASS I PRICE \$4.68; BLEND, \$4.05

IN-AREA WHOLE MILK SALES DOWN 1.4 PERCENT

U. S. Department of Agriculture
Agricultural Marketing Service
Washington, D. C.

Milk Marketing Orders Division
Issued May 1963

TABLES

Table No.

Page No.

1. Federal order minimum class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, March	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-March averages	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, March.	8
4. Producer milk deliveries used in Class I and Gross Class I sales by handlers regulated under Federal orders, March.	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I, January-March.	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, February 1963, with comparisons.	14
7. Federal milk order Class I formula price information, March 1963	18
8. Federal order base and excess prices for milk of 3.5 percent butterfat content and minimum class and blend prices at basic test (markets where basic test is other than 3.5), March	19
9. Prices and economic indexes used in Federal milk order formulas to determine March 1963 prices, with comparisons.	20

MAJOR ORDER ACTIONS, MARCH 1963

Amendments:

Central Arkansas (March 1). Action establishes the Memphis Class I price in Central Arkansas for the period March 1 through May 1963. Changes the Class I differentials for the period June 1, 1963 through May 31, 1964.

Corpus Christi (March 1). Major changes include handler status for a cooperative association on bulk tank milk and defines a "market equilization plant". Revises location differentials, adjusts basic Class I milk price, and provides for a "Cheddar Cheese Credit". Minor changes in shrinkage, transfer, and allocation provisions.

Tri-State (March 1). Provides the inter-change of March and August seasonal Class I price differentials and revises the supply-demand adjutor.

Suspensions:

Chicago (March 1). Suspends the classification section references to "in bulk" to provide Class III classification of milk disposed of in consumer packages to bakeries, soup, and candy manufacturing establishments.

13 Markets (March 1). Continues the presently effective rate of compensatory payment at the difference between Class I and blend price until amendment action can be made effective.

Black Hills	Des Moines	Knoxville	Sioux City
Chattanooga	Eastern South Dakota	Paducah	Suburban St. Louis
Chicago	Indianapolis	St. Louis	Texas Panhandle
Central Arkansas			

Suspensions and Terminations:

5 Markets (March 1). Action terminates previous January 1 and February 1 suspensions of compensatory payments at the difference between the Class I and surplus prices. Suspension action makes payments at the difference between Class I and blend price until amendment action can be made effective.

Cedar Rapids-Iowa City	Red River Valley
Louisville-Lexington-Evansville	San Antonio
Quad Cities-Dubuque	

March Highlights

Class I sales. Total Class I sales, in-and-outside of defined marketing areas, by handlers regulated under 80 Federal milk orders (orders which have been under regulation the entire time since January 1, 1962) were 2.8 billion pounds in March, 0.3 percent greater than such sales a year ago. Complete sales of Class I products, by markets, are reported as "Gross Class I" on table 4.

Producer deliveries. Milk delivered by 178,481 producers in the 80 markets totaled 4.6 billion pounds this month, 1.5 percent higher than such deliveries made by producers in these same markets in March 1962. Daily deliveries by producers in these markets averaged 826 pounds per producer, an increase of 7 percent over deliveries per producer in March 1962. Number of producers, daily deliveries per producer, and average butterfat percentage by markets are reported on table 3.

Producer deliveries in the 80 markets, year to date for 1963, totaled 13 billion pounds, an increase of 2 percent over such deliveries in the period January-March 1962.

Producer deliveries used in Class I. The volume of producer deliveries used in Class I totaled 2.8 billion pounds, a slight increase of 0.5 percent over such deliveries to handlers in the same 80 markets in March 1962. This increase in producer deliveries used in Class I offset the 1.5 percent increase in total producer deliveries and resulted in a combined Class I utilization percentage of 61 percent, the same utilization percentage recorded by these markets in March 1962.

Producer deliveries used in Class I, year to date for 1963, totaled 8.1 billion pounds, an increase of 2.2 percent over such deliveries to handlers in the same markets in January-March 1962. Year to date data on producer deliveries and producer deliveries used in Class I, by markets, are reported on table 5.

Minimum prices. The weighted average of minimum Class I prices paid by handlers in the 80 markets for 3.5 percent milk was \$4.68 per hundredweight, 14 cents lower than the \$4.82 per hundredweight in March 1962. Minimum Class I prices for March were higher in 9 markets and lower in the remaining 71 markets.

The weighted average minimum Class I price paid by handlers in the 80 markets, year to date for 1963, was \$4.78 per hundredweight, 13 cents lower than the \$4.91 price per hundredweight paid in the period January-March 1962.

The weighted average minimum blend price paid to producers in the 80 markets for 3.5 percent milk was \$4.05 per hundredweight, 14 cents lower than the \$4.19 per hundredweight price paid producers in March 1962. Minimum blend prices to producers were higher in 10 markets, unchanged in 2 and lower in the remaining 68 markets.

The weighted average minimum blend price paid to producers, year to date for 1963, was \$4.15 per hundredweight, 13 cents lower than the \$4.28 price per hundredweight paid producers in the 80 markets for the period January-March 1962. Year to date data on Class I prices and blend prices, by markets, are reported on table 2.

Whole milk sales. Total in-area sales of whole milk in March for 73 marketing areas are estimated to be about 1.8 billion pounds, 1.4 percent below such sales in the same month last year. Complete February in-area sales data for total fluid items, and for the four major fluid product groupings: whole milk, skim milk items, mixtures, and cream are reported on table 6.

Table 1.- Federal order minimum class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, March
